

Thermal Oxidizers for Sale

LCEC Item Numbers: 108240 & 108241

The Met-Pro Thermal Oxidizer System.

The system is designed for the following process conditions:

Process flow: 3,000 scfm @ 70F

Solvent loading: 342 lb/hr

Inlet pressure: +21" w.c.

The system consists of two identical thermal oxidizers with hot gas quench and acid scrubbers. Each oxidizer is capable of handling 3,000 scfm. In normal operation both oxidizers operate on a flow of 1,500 scfm each. They share a common stack/scrubber system.
