

Complete Plants for Sale

Hydrogen Plants:

Designed by Davey Powergas
95% Purity
11.65 MMSCFD

Designed by Wellman Powergas
95% Purity
7.1 MMSCFD

Ammonium Sulfate Unit:

Approximately 1000 TPD

Ammonium sulfate is a co-product of Caprolactam manufacture and is provided to the Ammonium Sulfate processing unit as an aqueous solution containing approximately 42 to 44% ammonium sulfate.

Nylon 6 Polymer Plant: General Information

Plant was built in 1998/1999. Runs two separate lines for a combined 140 Metric Tons per Day for a combined 49,280 Metric Tons per Year, or 60,000 KTPY.

LINE #1

This plant was designed and is operated to make Nylon 6 Polymer in chip form. This unit was originally designed to produce 100 metric tons per day of polymer.

LINE #2

This plant was designed and is operated to produce Nylon 6 Polymer in chip form. The unit was designed to produce 40 Metric Tons per Day of Polymer.
